SWISS COLOR® PMU PIGMENTS
SC & OS PIGMENTS

The heart of all PMU treatments are the pigments. We offer for the various applications high quality pigments to convince you and your customers.

We only use fully synthetic pigments of which the quality of raw materials (according ResAP 2008/1) is guaranteed and run further tests by independent accredited laboratories. We have MSDS Material Safety Data Sheets about the ingredients available. Swiss Color® pigments contain no hazardous AZO dyes, no PAH = polycyclic aromatic hydrocarbons, no heavy metals, and no hazardous aromatic amines including NDELA = Nitrosodiethanolamine.

All Swiss Color® pigments do not contain iron oxides.

Our colorcards offer a very good overview of the different shades. In our onlineshop you will find a detailed description of each pigment color, if you want we can send them to you by e-mail as well. All of our pigment colors are ready to use and are mixing very well with each other. But only mix colors of the same pigment group (do not mix e.g. OS pigments with SC pigments!). Due to the high pigment content our colors have a very good durability in the skin. For the correct application of Swiss Color® pigments we offer special color courses, because it is very important to choose the appropriate pigment for every different skin type.

For more information about the Swiss Color® pigments please contact us any time!

Swiss Color® OS pigments & tricho-pigments

Try our OS pigment range with 47 colour shades. Special about these colors is that they are totally free of iron oxides. The OS pigments are very opaque and color stable. Due to the high pigment density the colors look very real. The treatment time is shortened and costly rework is eliminated.

SWISS COLOR® EXPERT TIP

Agnieszka Mikołajczuk
SC Master Trainer, Poland
★★★★

Radiantly red lips for your customers! The SC Master Trainer Agnieszka Mikołajczuk reveals exclusively her OS pigment tip, which she prefers to emphasize the lips of her customers.

Use the popular OS pigments OS 261 Tango and OS 257 Koralle in the ratio 2:1, for a rich, individual shade of red.

For mixing the pigments the Swiss Color® color pots in different sizes are very suitable. You can individually prepare the colors for your customers.

For mixing the pigments use the fine and hygienic Micro Brushes (p.45). These are delivered in a practical dispenser!

Swiss Color® OS lip-pigments

The 18 different OS pigments for lip pigmentation are characterized by their iron oxide and heavy metal free recipe, which are very suitable for all kinds of powdery application techniques. Their creamy texture facilitates incorporation into the lip area.

SWISS COLOR® PMU PIGMENTS
IL PIGMENTS

After 2.5 years of development and testing, Swiss Color® was able to launch the new generation of lip pigments in September 2017. The Swiss Color® IL Intensive Lip pigments include 10 lip pigment nuances. They have an iron oxide-free, slightly creamy recipe and good flowing texture. However, they are especially recommended for contour and shading trend techniques of the lips, like Ombre Lips, Pixel, Powder and Pearl Lips. These fully synthetic pigments

are based on water glycerine and do not contain allergy carriers, which make them especially gentle to the skin.

The standardised pigment size was specially tailored to the needs of the lip area and meets the high requirements of the ResAP (2008) and the new pharmaceutical raw materials regulations of 04/2013.

IL color description

Based on yellow/orange, balances out cool lip colors and makes them look warmer.
Dynamic red, warm undertones with an intense shade of red, for a strong expression.
Yellow/pink warm undertones, for a clear, fine color.
Cool pink lip shade, with an intense red character.
Cool reddish blue undertone, for a strong lip result.
Dominated by reddish blue pigments, classic lip color with a cool expression.
Strongly darkened shade of brownish red, reddish blue undertone, suitable for darkening.
Earthy and harmonious shade with a touch of maroon.
Powdery shade with a yellowy ashy undertone for an intense nude look.
Powdery and light color for discreet lips, with a pinkish yellow undertone.

SWISS COLOR® EXPERT TIP

Mandi Barnard
SC Trainer, South Africa
★ ★ ★

Use the iron oxide free pigment IL 10 Candy as base pigmentation to lighten the lips of your customers and make them look warmer.

The risk of bluish lip results is mostly reduced!

SWISS COLOR® PMU PIGMENTS
IB PIGMENTS

The new Swiss Color® IB intensive Brow pigments have an especially developed flow consistency for all application techniques of Permanent make up, like Pixels, Shading, Ombré, Nano, as well as Microblading of the eyebrows. These pigments are 100% free of titanium dioxide, tartrazine, harmful PAHs, nickel, fragrances and preservatives, as well as hazardous AZO dyes. The fluidity of the pigments is positively influenced by the special PFO (pigment flow Optimizing) process developed by us in Switzerland. Thanks to PFO, we get a smooth and silky color texture, which shortens the incorporation period while pigments. The IB pigments have a high color density, which makes it easy to achieve optimal saturation.

SWISS COLOR® PMU PIGMENTS
COLORCARD IB PIGMENTS & PIGMENT CHOICE

IB pigments			
	IB 30 Gold Brown		IB 31 Nature Brown
	IB 32 Medium Brown		IB 33 Classic Brown
	IB 34 Dark Brown		IB 35 Black Brown
	IB 36 Ash Brown		IB 37 Orange

IB color description

- Fine honey caramel tone for gentle underlining with Ombré techniques. Mixing base pigment for all IB pigments.
- Warm, natural mid brown tone ideal for ladies with Brunette hair. Is often used as a mixing color.
- Ash-blond pigment tone for ladies with dark blonde hair. Elegant expression for mature ladies.
- Classic medium brown tone. For elegant color expression for all ages.
- Classy dark brown tone for ladies with dark hair color. The expression is stronger and more intense.
- Exclusive dark brown tone for ladies with very dark hair color. The emphasis is stronger and shows a clear color dominance.
- Striking black-brown tone for ashy-cool results especially for Asian skin types, but also for very dark to black skin types perfectly usable.
- Orange/yellow correction and mixing color to warm all IB shades of brown and as a correction pigment against existing bluish color changes.

SWISS COLOR® EXPERT TIP

Monika Poškutė
SC Instructor, Lithuania
★★★★

Monika Poškutė prefers to use the IB pigments IB 33 Classic Brown and IB 34 Dark Brown. There are two very warm shades of brown, which she uses because of their attractive consistency and color stability for the Nano hair strokes technique.

IB 33 Classic Brown is a mid brown shade that works well for blonde hair types. Monika Poškutė recommends this pigment to customers who fear to get too dark eyebrow pigmentation. This pigment develops very naturally and with a warm nuance.

In addition, she is thrilled by the pigment IB 34 Dark Brown for emphasizing natural pigmentations of the eyebrows. It creates a natural but intense result without an artificial look.

SWISS COLOR® PMU PIGMENTS ACCESSORIES

You get the best PMU results if you respond to the wishes and needs of your customer. Therefore a high level of understanding of the mixing behavior of the different colors is necessary. The color circle is a very useful tool. With this tool you can already test your mixtures in advance.

SC Pure Skin

SC Pure Skin is a coconut-based facial cleanser and suitable for all skin types. With the high-quality jojoba ester it removes spare color pigments safely before or during Permanent make up or Microblading treatments.

SC Pure Skin contains high-quality jojoba ester, which naturally hydrates and intensively nourishes the skin. The contained vitamin E additionally stimulates the regeneration ability of the skin.

It is recommended as daily removal product of make-up at home as well as in your studio before beauty sessions to cleanse the skin of the customer and to remove existing make-up.

During the beauty treatment SC Pure Skin can be used to wipe off spare pigments to better recognize pigment-free areas. This allows you to create better Permanent make up results by identifying pigment-free areas very quickly. This product does not dissolve the implanted pigments out of the skin and does not distort the PMU result.

You can also recommend SC Pure Skin as a daily cleaning solution as special home care, because it gently removes make-up and cleanses the pores. The skin is optimally nourished and the Permanent make up or Microblading of your customer will be perfectly cared.

If you want to get further information about this special cleanser please contact us directly!

ITEM NO.	NAME	SIZE
1229	SC Pure Skin	200 ml

Please note that endogenous pigments plus color pigments lead to the effective color. All Swiss Color® pigments can be mixed together within their pigment class, but we recommend to mix only a maximum of 3 pigments at once.

SC Brow Brush & Applicator

This set for Permanent make up and Microblading is packed as pairs in a sterile way. The versatile brushes can be used for eyebrow pigmentation, but also for example for mixing and applying pigments.

ITEM NO.	NAME	Pcs./Pac
1195	SC Brow Brush & Applicator	25

Color circle

In addition to the primary colors, which are the starting point for all color mixtures in color theory, the color circle also shows the complementary colors whose knowledge helps you to determine the correct color mixtures for special correction treatments.

ITEM NO.	NAME
1208	Color circle

With the Swiss Color® additives, it is possible to counteract various skin problems. Effortlessly you can, for example, treat scars. The pigments can thereby be incorporated in a quick and easy way.

SWISS COLOR® PRODUCT HOTSPOT

Swiss Color® help Transponder

- 1 Apply a little amount of the Swiss Color® Transponder with the Microbrush on the area, which has to be pigmented.
- 2 You will feel immediately during pigmentation how soft and smooth the skin gets. Attention: do not apply too much Transponder, so that the skin is still able to absorb the pigments properly.
- 3 The flexibility of the skin will be improved and the skin won't rip anymore. It increases also the absorbability of the color pigments.

Transponder

The Transponder prepares the skin to become very elastic and makes it fit for a treatment within a few minutes. The Transponder is especially suitable for scar tissue and callus skin. The skin gets very smooth, does not rip anymore and even gathers the color easier. Especially suitable for scars and skin with firm structure.

ITEM NO.	SIZE
SC002	12 ml
SC002-16	16 ml

SWISS COLOR® PMU PIGMENTS HELPS

The easy handling of the Swiss Color® helps make a perfect Permanent make up or Microblading result possible.

Gigaplast

Gigaplast is an antibacterial sealer to apply on the pigmented area after the treatment. It prevents bacteria to enter and the micro scab is thinner. With Gigaplast, the colors are kept better in the skin. Application: Apply the Gigaplast with a Microbrush on the lips or brows. After 2-3 hours the Gigaplast can be dabbed off with a cleansing tissue.

ITEM NO.	NAME	SIZE
SC001	Gigaplast	12 ml
SC001-16	Gigaplast	16 ml

Thinner

The thinning of PMU and Microblading colors play a crucial role. Fat content, pH value, alcohol concentration and additives are essential for a good effect. The tuned recipe is ideal for the pigments and protects them against dehydration.

SWISS COLOR® PMU DEVICES & ACCESSORIES

Highest quality and hygiene for your daily professional use.
That's our guideline. All Swiss Color® products follow this
rule and lead to convincing results.

SWISS COLOR® PMU DEVICES & ACCESSORIES

PMU DEVICES

Devices with high standard of design as well as operability and comfort. Unbeaten in reliability and quality they will satisfy customers on their daily work with excellent results.

Besides the excellent quality, Swiss Color® offers a wide range of services, from financing to maintenance and support.

Swiss Liner Advanced

The device is a state of the art product for pigmentation. Using this equipment the stylist is enabled to emphasize the natural appearance of the customer. The cosmetic studio owns with this unit a device that allows a gentle, soft and precise handling for long-lasting Permanent make up drawing.

The disposable hygiene cartridges offer a high degree of safety to hygiene. During the removal of the hygienic cartridges, the needle immediately disappears into the needle jet. Thus the risk of injury with the contaminated needle, and the associated risks of infection (HIV, HBV) are avoided. A quick switch of the cartridges and the color is possible by the new cartridge system.

The Swiss Liner Advanced will be delivered together with the Classic hand piece, which shows a very ergonomic shape and is very easy to clean.

- 50-150 needle punctures per second (adjustable in increments of 5)
- running quietly with low vibration
- compatible with the hand pieces TOP or Classic
- ideal for problem skin in cosmetic and medical area
- 2 years warranty and product service

ITEM NO.	NAME	TYPE OF HYGIENE CARTRIDGES
1006	Swiss Liner Advanced	Classic hygiene cartridges

Swiss Liner Infinity

The Swiss Liner Infinity impresses with elegant simplicity and its modern design. It will be an eye-catcher in your cosmetic studio. Swiss Liner Infinity is especially suitable for diverse pigmentations in the cosmetic and medical area. It provides 50-150 needle punctures per second. Due to its space-saving and handy size, this device is also ideal for mobile Permanent make up stylists.

The Swiss Liner Infinity will be delivered together with the Classic hand piece, which shows a very ergonomic shape and is very easy to clean.

The pigment colors can be either dropped into the hygiene cartridges or when the engine is running, the color can also be absorbed.

- 50-150 needle punctures per second
- compatible with the hand pieces TOP or Classic
- manufactured from high quality materials
- easy-to-clean surface made from brushed aluminium
- ideal for mobile Permanent make up stylists
- 2 years warranty and product service

SWISS COLOR® PMU DEVICES & ACCESSORIES

PMU DEVICES

Swiss Liner Symphony II

The Swiss Liner Symphony II is a high quality device that works reliably and safely. It is certified, tested and meets all hygienic requirements. It includes a hand piece, control unit, adapter and a foot pedal.

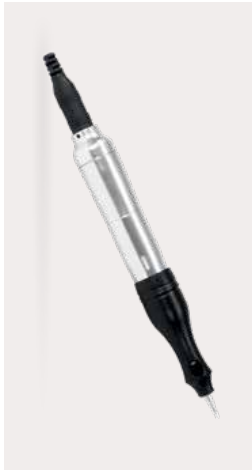

When pigments, the Swiss Color® pigments are implanted into the top layer of skin through the incisions. Due to the adjustable needle punctures per sec of the Swiss Liner Symphony II, it is possible to treat problem skin easily too. The unit Swiss Liner Symphony II is ideal for cosmetic, medical pigmentation and Lift Meso treatments.

The pigment colors can be either dropped into the hygiene cartridges or when the engine is running, the color can also be absorbed.

- Speed adjustable
- Very light hand piece
- No risk of infection due to the extra large hygiene cartridges
- Needle length individually adjustable
- Working with or without foot pedal possible
- 2 years warranty and product service

ITEM NO.	NAME	TYPE OF HYGIENE CARTRIDGES
1150	Swiss Liner Symphony II	Symphony hygiene cartridges

Hand piece Symphony Liner I

The Symphonie Liner I allows pigmentation without control unit, but you can also use it together with the Swiss Liner Symphony II PMU device. This hand piece is characterized by an easy handling and is very easy to clean. The Symphonie Liner I is delivered together with a foot pedal and power supply.

ITEM NO.	NAME	NAME
1004	Hand piece Symphony Liner I	Derma SR 8 hand piece

Derma SR8 hand piece

The Derma SR8 hand piece is recommended for the most precise Microneedling treatment. With its adjustable needle length you can effectively treat deeper skin layers. It was specially developed for the Derma SR8 method of scar treatment and for activation of inactive hair follicles. Hygiene cartridges on T 261

6 Microneedling Derma hygiene cartridge

This twistable hygiene cartridge has been specially developed for the Derma SR8 hand piece, which is only compatible with this hand piece. The 6 very fine needles consist of surgical steel and perforate the skin exactly for the best treatment results.

ITEM NO.	NAME	PCS./PAC
1175	6 Microneedling Derma hygiene cartridge	8

Lift MESO Derma hygiene cartridge

This twistable hygiene cartridge has been specially developed for the Derma SR8 hand piece and is only compatible with this hand piece. The high-quality hygiene plate is made of tested plastic. It can be used for the diamond as well as the stamping technique.

ITEM NO.	NAME	PCS./PAC
1176	Lift MESO Derma hygiene cartridge	8

For the development of our various hygiene cartridges we use only the latest technology, high quality materials and years of experience. We know that each PMU stylist has developed his/her own style over time, therefore a wide range of different hygiene

cartridges is advantageous. The basis of the hygiene cartridges forms a medically approved plastic; the needles are made of stainless steel. The production is kept under constant and independent control in order to ensure superior quality.

1 – NANO NT
It lends itself especially for very fine hair techniques, extra stable thanks to metal tubes.

1 – NANO (1) & (2)
Suitable for very natural and realistic eyebrow hair technique and extremely thin lines.
Ø 0.20 mm / Ø 0.25 mm

1 – MICRO
Even finer and more accurate than the 1 hygiene cartridge. Suitable for finest hair and fine, soft lines.
Ø 0.18 mm

1 – LINER
Suitable for eyebrow hair technique and thin lines.
Ø 0.33 mm

3 – MICRO
Fine eyeliner and shades for brows. The sensation of pain is reduced to a minimum by 3-needle points. Thin skin is easy to pigment with this needle. Ø 0.18 mm

3 – OUTLINE
Finer needles as 3 hygiene cartridges. Suitable for fine eyeliner, subtle lip shades and lip contours.
Ø 0.25 mm

3 – LINER
Especially suitable for lip contour shading and firmer lines.
Ø 0.33 mm

3 – POWER
Dense and thin lines possible. Well-suited for intense eyebrows, eyeliner and lip contour. Power needles carry more color per insertion. Ø 0.33 mm

3 – SLOPED
The slanted needles are always at the same depth in the skin, providing evenly pigmentation for eyeliner, lip and eyebrow. Ø 0.33 mm

4 – FLAT
It is for large shading areas like lip shading and areola pigmentations.
Ø 0.33 mm

5 – ROUND
For lip shading, wide contour of the lip, areola pigmentations, corrections and intensive broad eyeliner. Ø 0.33 mm

5 – SHADER
For lips or eyebrow shades or generally full shades.
Ø 0.33 mm

5 – POWER
Thick and thin lines are possible, suitable for broad eyeliner and for wide lip contour. Power needles carry more color per insertion. Ø 0.33mm

5 – MAGNUM
Flat needle system.
For lip shading, areola and hair thickening.
Ø 0.33mm

5 – SLOPED
Due to the 5-fold amplification, the hygiene cartridge is for the lips, and for a wide upper eyeliner.
Ø 0.33mm

7 – ROUND
For areola pigmentation, big lip surfaces and hair thickening.
Ø 0.33mm

7 – POWER
Density and wide lines possible. For broad - stroked eyeliner, wide lip contour and hair densities.
Ø 0.33mm

9 – MAGNUM
Used for areola pigmentation or hair thickening.
Ø 0.33mm

LIFT MESO METAL
For Lift MESO concept treatment of the face and cleavage. Only use stamping technique.

LIFT MESO
For Lift MESO treatments. Stamping and diamond technique.

LIFT MESO DERMA
For Microneedling treatments and follicle stimulation. Stamping and diamond technique. Only for Derma SR8 hand piece.

MICRONEEDLING DERMA
For Microneedling treatments and follicle stimulation. Only stamping technique. Only for Derma SR8 hand piece.

SWISS COLOR® PMU DEVICES & ACCESSORIES ACCESSORIES FOR DEVICES

COOL Spot

COOL Spot is a cooling treatment before or after a PMU application. The aluminum top cools and provides soothing, calming cold. Hematoma and swellings get reduced. The sensation of pain gets reduced and the lymphatic flow is minimized. The incorporation of the pigments and the healing process will be supported.

ITEM NO.	NAME
1007	COOL Spot

PMU-control pen

The PMU-control pen shines through the pigmented skin and makes omitted or missing points visible. It allows you to control your PMU works and is especially useful in eyebrow and lip pigmentation.

ITEM NO.	NAME
1172	PMU-control pen

Hand piece Classic

The straight hand piece Classic is light, fits nicely in the hand and runs very quietly. You hardly feel any vibration and it does not heat. This hand piece Classic is compatible with our precision pigmentation devices Swiss Liner Advanced and Swiss Liner Infinity.

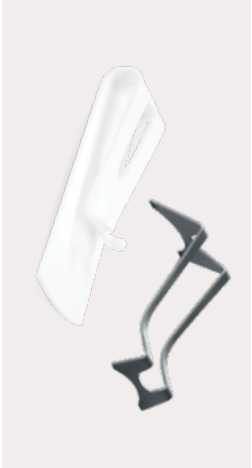

ITEM NO.	NAME
1011	Hygiene hand piece Classic

Magnifying glasses with LED lighting

The magnifying glasses with LED lighting are a very pleasant help for PMU and Microblading treatments. Both hands remain free, and you can work on customers unfettered. Furthermore, you can equip the magnifying glasses also with 2 different lenses, so you get a total of 11 different strengths. Both are mounted on an elastic band which ensures a perfect fitting.

ITEM NO.	NAME
2002	Magnifying glasses with LED lighting

Hand piece holder

Ergonomically shaped hand piece holders made of plastic with white high gloss surface or metal for your Swiss Liner hand pieces or your Microblading Pen. Hygienic storage of your hand pieces during the beauty treatment. Very easy to clean and reusable.

ITEM NO.	NAME
1251	Plastic
1005	Metal

Pen & Wire Cover

To comply with current hygiene standards, Swiss Color® recommends to cover the cables of the hand pieces with the hygienic pen & wire cover. Intended for single use. This product ensures a hygienic environment during your treatments and creates a positive impression to your customers. 16 pcs./pac

ITEM NO.	NAME
1252	Pen & Wire Cover

Power supply

Power supply for your Permanent make up device. When ordering please indicate your device name. Also individually as additional Power supply available. Swiss Color® recommends to cover the cable with the practical hygienic pen & wire cover during each treatment to ensure a sterile environment.

ITEM NO.	NAME
1009	Power supply

Foot pedal

In addition to the variable needle setting directly on the Swiss Liner device you can also vary the needle speed by using the foot pedal. Your advantage: if you have to change the speed during the treatment you do not have to touch Swiss Liner device or interrupt your treatment to manually adjust the speed. When ordering specify your device name.

3 SWISS COLOR® MICROBLADING

Microblading is a manual pigmentation technique, which enables the creation of very fine, naturally looking eyebrow hairstrokes or shadings. It is especially suitable for Permanent make up beginners.

SWISS COLOR® MICROBLADING
MB PIGMENTS

Discover our full selection of Microblading products for your perfect Microblading treatment.

The Swiss Color® team is glad to present you the Microblading pigments. Get yourself inspired by our MB pigments! The pigments have an especially creamy oily texture which makes them perfect for Microblading, but also perfectly balanced for

Permanent make up creations and Nano-technique. Due to the special texture, you need less color and save money and time. The iron oxide and heavy metal free composition reduces the risk of allergic reactions; the pigments are color stable and fade quite evenly. Because of the high pigment concentration approx. 60-80% of the color pigments remain in the skin and lead to a very natural and bright treatment result.

SWISS COLOR® MICROBLADING
COLORCARD MB PIGMENTS & PIGMENT CHOICE

MB color description

Finely turned golden yellow camouflage color, is for highlights between the eyebrow hairs. No mixing color!

Orange/yellow correction color to lighten the dark MB pigments, to correct blue or green color casts, to warm cool brown tones.

Correction color for reddish eyebrows, can be used pure or mixed with brown to create an ashy result.

Natural color for light blond or reddish hair types, can be used pure or mixed. In combination with Flamingo, the tone becomes golden and even warmer.

For light brown to medium brown hair types, nice soft medium to dark brown, mix with MB 802-2 to get a warm hazelnut brown.

Good starting tone for darker skin types, pure results in the color a rich chocolate brown, for cool skin undertones we recommend to add a little MB 802-2.

Ashen, olive brown shade, cool results can be achieved in combination with MB 802-2, it results in a dark, warm brown.

Slightly ashy, olive dark brown, cool results can be achieved in combination with MB 802-2 a dark, warm brown.

Rich black-brown tone, can be used pure or with one touch MB 802-2 for warming up.

Tatyana Polivanova
SC Master Trainer, Ukraine
★★★★★

Obtain naturally pigmented eyebrows easily with the manual method Microblading.

SC Master Trainer Tatyana Polivanova recommends blending MB 809 Dark Chocolate with a small drop of MB 802-2 Flamingo for dark hair and skin types. MB Flamingo warms up the shade of brown and produces a very natural treatment result.

SWISS COLOR® MICROBLADING MB SETS & MB BLADES

SWISS COLOR® PMU ACCESSORIES
ACCESSORIES

We provide a wide range of different accessories for Permanent make up and Microblading for your cosmetic studio. Order all products for your daily use, such as hand mirror, tweezers, surgical

mask or mixing bottles. Highlight: the new, transparent Swiss Color® Mask is very convenient and breathable.

perfect Lip

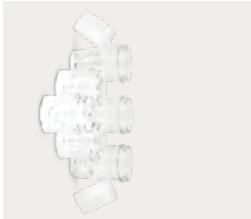

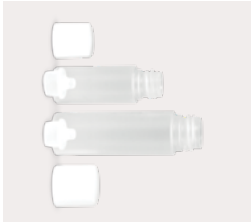

perfect Lip eases your lip pigmentation. It allows more precise lines and shades. Through this protection, (hygienically single-use per client) the position of teeth is straight, stretched and pillowed by perfect Lip. No color or other substances can percolate into the mouth.

It increases the sense of security of the customer, as it protects against the unwanted ingress of fluid into the mouth of the customer. In addition, perfect Lip improves actively the quality and lines of your pigmentation, because the customer's lip is ideally stretched. It consists of medically tested plastic.

Attention: product is a disposable good, please dispose after each customer.

- Medically tested plastic
- Protects the client's mouth from ingress of liquid
- Tightens the lips for easier pigmentation
- Protects the teeth of the customer
- Hygienic through "single use" application

SWISS COLOR® ACCESSORIES
ACCESSORIES

SWISS COLOR® PMU ACCESSORIES AFTERCARE

The proper post-treatment care products are crucial for the healing phase and for the durability of the pigments in the skin.

Only the correct aftercare treatment will guarantee satisfying Permanent make up and Microblading results.

SC lipbalm & SC naturebalm

For pigmented eyebrows and lips we recommend to use the SC balm prior to the first treatment. It is created with SPF 15. You can recommend it to your customer at the preliminary meeting, to use these care product to optimally prepare the lip for the Permanent make up. Pigmenting of soft lip skin is significantly easier and the result appear even better. This affects also the regeneration time positively.

The included SPF 15 protects the pigmented area from harmful effects of the sun. UV rays make the pigments fade faster. The regular application of the care sticks softens the skin and positively affect the pigments. They will last much longer. The extracts of Cardiospermum halicacabum promote the cell regeneration. Consisting of a high-quality moisturizer and enriched with tri-peptides. The SC balm create a smooth feeling and give the lips more volume.

The SC naturebalm is transparent and can be used for the eyebrow care as well as for the lips. SC lipbalm warm and SC lipbalm cold give your lips a delicate red shine.

The Swiss Color® care sticks are suitable for every skin type. Customer should use this care product several times daily to protect the skin from drying out.

Also as combination set (6x 1313, 3x 1314, 3x 1311) incl. free display.

ITEM NO.	NAME	PCS./PAC
1313	SC naturebalm (eyebrows and lips)	10
1314	SC lipbalm (lips) cold	10
1311	SC lipbalm (lips) warm	10
1312	Combination set incl. free display	12 (1 display)

Aftercare cream Grazia

We recommend to apply the care cream Grazia 2-3 times a day after the pigmentation treatment approx. for 10 days. The care cream Grazia is a semi-solid W/O emulsion with a water content of about 30%.

The contained vitamin E ensures that the pigmented area stays moist during the regeneration phase. Please use a clean cotton pad to apply the cream.

The cream Grazia 5 ml pots are particularly suitable for passing to your customers as homecare product.

The care cream Grazia is also available as cabine size in 250 ml. Please use the cream to remove spare pigments. Be sure to use a spatula and close the Grazia pot immediately after opening to avoid unintentional germination.

The cream Grazia is very suitable for removing spare pigments on the surface of the skin. It does not influence the pigmentation or wash out pigmented areas.

With the right care product the pigments will hold longer in the skin and will appear brighter.

5 SC COLORX SC COLORLIGHT

Remove or brighten unfavourable pigmented eyebrows with the SC colorX or SC colorLight method.

SC COLORX & SC COLORLIGHT
PRODUCTS

What if a Permanent make up or Microblading treatment leads to an unpleasant result? If the shape is unbeneftitting or the color has been chosen wrongly? With our new products SC colorx and SC colorlight based on lactic acid, pigmented eyebrows, which can't

be corrected anymore, can be removed or brightened permanently without a laser. These new removal methods can be learned in our special trainings. You are welcome to order our high-quality products only with a proven certificate of our training course.

Advantages of SC colorX and SC colorlight

The treatment with SC colorx or SC colorlight needs the Swiss Liner devices. Remove a small part of the upper skin (epidermis) by the help of hygiene cartridges. Then apply the appropriate solution, the SC colorx or SC colorlight, to the prepared area of the skin. Use a Microbrush* to gently rub the liquid into the skin to start the acid reaction. It pulls out the old pigments.

The composition of the liquid causes that the so-called macrophages, which previously enveloped the pigments, dissolve and release the pigments, due to the large difference in pH-value.

When using the SC colorX up to 100% of the pigments can be dissolved. By contrast, SC colorlight has a lightening effect due to the lower-dosed, patented lactic acid, which can be used for a correction work of very dark eyebrows. The dissolved pigments are then transported to the skin surface and bound in the micro-scab. After the healing phase, the new and regenerated skin can be seen.

Please note that our products SC colorX and SC colorlight can be sold only in conjunction with a proven education.

SC colorlight

The removal fading product SC colorlight is based on lower concentrated, patented lactic acid. It causes the pigments in the area of the eyebrows to lighten to allow a new, natural pigmentation. Fine, small-scale work significantly minimizes the risk of scarring.

ITEM NO.	SIZE	PCS./PAC
2007	3 ml	1

SC colorX

The Permanent make up and Microblading removal product SC colorX is based on patented lactic acid, which could remove unwanted pigments in the area of the eyebrows. By doing small-area dots, the risk of scars can be reduced to a minimum.

SWISS COLOR® EXPERT TIP

Jenni Määttä
SC Trainer, Finland
★★★★★

The SC trainer Jenni Määttä recommends the product Neutralisat in addition to the classic Lift MESO Concept application also for the SC colorX & SC colorlight treatment.

Neutralize the SC colorX or SC colorlight liquid as soon as you have achieved the desired treatment result. With the Neutralisat you can monitor the reaction of the patented lactic acid and thus prevent excessive skin reaction.

Once you have achieved the desired treatment result by the removal fluid, carefully apply the Neutralisat with a clean applicator stick on the treated area. The acid reaction of the treatment liquid is thereby stopped. The contained panthenol calms the skin additionally.

Neutralisat

Use Neutralisat to neutralize all types of acids (fruit acid, lactic acid, salicylic acid, glycolic acid). The product stops the acid reaction on the skin with its basic composition. Caution: Protect the skin from direct sunlight after each acid treatment.

ITEM NO.	NAME	SIZE
1168	Neutralisat	200 ml

SWISS COLOR® MARKETING & EDUCATION

High quality and informative advertising materials allow you a professional marketing of your services. Promote also your knowledge through continuing education.

PERMANENT MAKEUP

SCHÖNHEIT, DIE BLEIBT

**Microblading
For perfect eyebrows**
Draws attention to your face: naturally emphasised eyebrows! Find out more at your institute about the special technique of microblading that shapes your brows to suit your type.

WHAT IS MICROBLADING?
Microblading is a permanent, natural eyebrow technique that uses blades to draw very fine lines into the skin. These lines are made of color and last for up to 3 years. The procedure is very safe and painless. The results are natural and long-lasting.

APPLICATION
After your personal consultation, the treatment is carried out in 2 steps. First, the eyebrows are shaped and then the color is applied. The procedure is very safe and painless. The results are natural and long-lasting.

RECORD:
Before the treatment, the eyebrows are photographed. After the treatment, the results are photographed again. The difference is clearly visible. The procedure is very safe and painless. The results are natural and long-lasting.

BEFORE:
Before the treatment, the eyebrows are photographed. After the treatment, the results are photographed again. The difference is clearly visible. The procedure is very safe and painless. The results are natural and long-lasting.

Treatment examples

SWISS COLOR® PERMANENT MAKE UP
The Swiss Color® Permanent Make Up is a professional, safe and long-lasting treatment. It is suitable for all skin types and ages. The results are natural and long-lasting. The procedure is very safe and painless. The results are natural and long-lasting.

HALTBARKEIT D
Bedanken Sie je genauer Sie sich informieren, desto besser. Halten Sie Ihre Permanent Make up für die ersten Wochen. Sie können sicher sein, dass wir in unserem Fachinstitut für Permanent Make up große Erfahrung haben und über eine fundierte Ausbildung in diesem Spezialgebiet verfügen.

Für pigmentierte Lippen empfehlen wir als Nachpflege das hochwertige IC Lipbalm oder SC Lipbalm von Swiss Color® mit SPF 15 UV Schutz und angereichert mit hyaluronsäurehaltigen Inhaltsstoffen. Lippen ein geschmeidiges Gefühl und gibt ihnen Volumen.

EIN UNBESCHREIBLICHES GEFÜHL
Wenn die Form der Augenbrauen natürlich verläuft, der feine Lidstrich den Augen mehr Ausdruck verleiht, die Lippenkonturen stimmen und das tägliche Schminken überflüssig wird, ist gepflegtes Aussehen rund um die Uhr möglich!

Wenn Sie mehr über Permanent Make up erfahren möchten, beraten wir Sie gerne. Sie können sicher sein, dass wir in unserem Fachinstitut für Permanent Make up große Erfahrung haben und über eine fundierte Ausbildung in diesem Spezialgebiet verfügen.

With the registration to the Swiss Color® E-Learning Academy academy.swiss-color.com you get access to extensive knowledge and special learning units in the field of Permanent make up, Microblading & Microneedling treatments.

Lifelong learning is one of the most important success factors in your business, stay always up to date! An individual and stress-free way of learning whenever you want! 24/7!

Contact us today and inquire for your personal E-learning Academy access credentials and all information about Swiss Color® online class offerings via mail: academy@swiss-color.com!

The growing online class program, the interesting download area as well as many additional features make this learning tool particularly interesting for people who are in the middle of their working life and who have a strong demand on individual learning solutions.

The Swiss Color® E-Learning Academy can be used both on the PC, as well as on your phone or tablet. Just read the various class contents, check your knowledge by short chapter quiz tasks and finish your education in your own speed by passing the online exam.

Your passed exam will be awarded by Swiss Color® with an official training certificate. Our certificates are internationally well-known. We wish you a successful start and that you enjoy your Swiss Color® E-learning training!

Swiss Color® your top contact for high-quality Permanent make up, Microblading & Paramedical trainings! Get up to the next level of your career and become more educated as SC Trainer.

SC Trainer education

Become the role model of the new SC Stylists generation as an SC Trainer and actively promote their strengths!

Important steps at a glance:

- Request of the SC application form at the SC Academy
- Approved registration by the SC Academy
- E-Learning Academy entrance phase
- Individual selection of training aspects (modules)
- Completion of certified trainer education incl. Certificate

After successfully signing up for your trainer education you start with the introductory phase on the E-learning Academy online platform. This must be done before starting the practical part and it has to be completed positively. This is followed by your personal specialization as a trainer based on your module selection.

Your skills are being tested in the practical phase directly at the SC Academy by further masterclasses and workshops. Additional lessons on hygiene, marketing and product training are also part of the practical phase. The trainer education is completed by the officially recognized and international significant SC Trainer certificate.

SWISS COLOR® MARKETING & EDUCATION TRAINER EDUCATION

As an experienced Permanent make up or Microblading Stylist you have also the opportunity, after a controlled selection process, to work as a certified SC Trainer in the Team of Swiss Color®.

Certificate

Swiss Color® strengthens your performance!

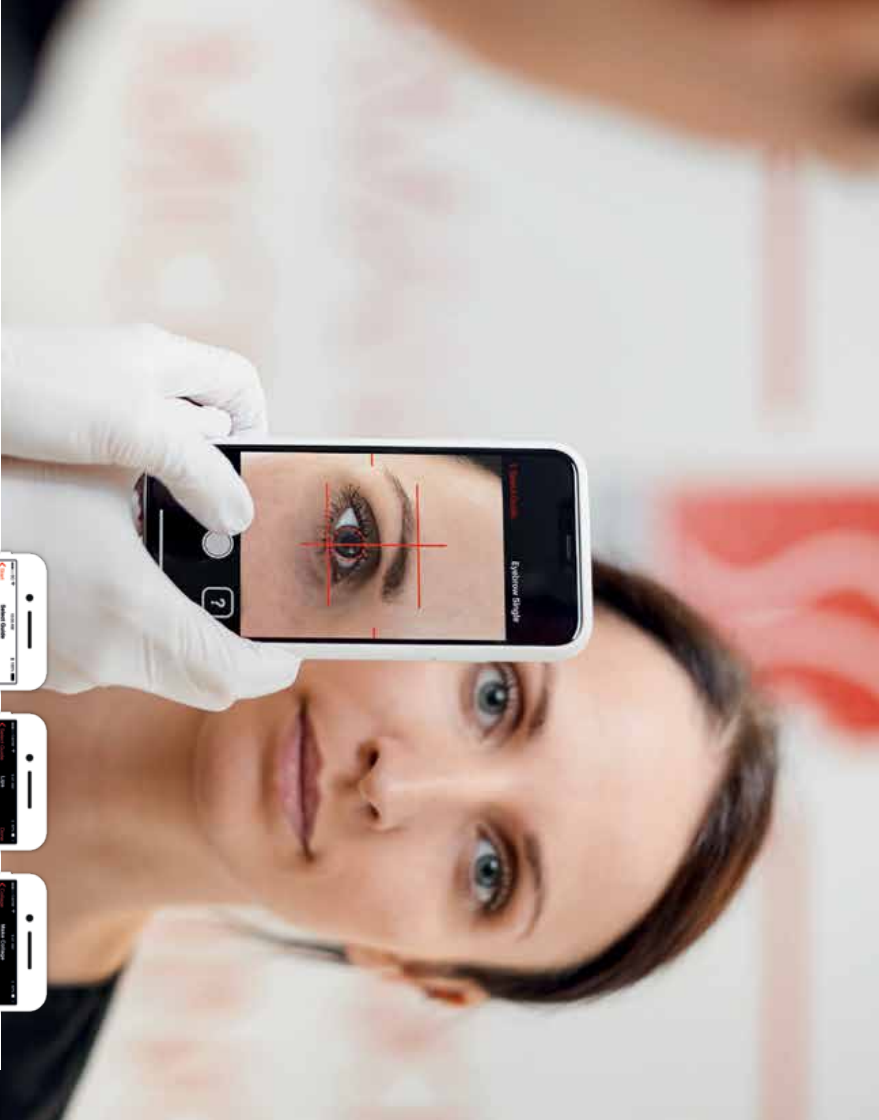

As SC Trainer, you are entitled to nationally and internationally do trainings, that means: trainings in the name and in collaboration with the brand Swiss Color®.

The cooperation between SC head office, SC Trainer and partner network throughout the world form a well-founded platform for the safe organization of your training in your and other countries. The application process of the SC Trainer education is subject to the strict guidelines and standards that SC set up for Permanent make up and Microblading trainings.

Especially important is a deep understanding for the principles, quality, service rules and design of the Swiss Color® brand.

For further information regarding the SC Trainer education or internationally well-known certificates of Swiss Color® please contact us directly!
